

LEAF LIQUID INTEGRATORS

MYR CALCIUM

Organic nitrogen fertilizer with Calcium

MYR CALCIUM is a liquid fertilizer properly studied to prevent and cure the deficiency of Calcium and to provide vegetal amino acids and peptides. MYR Ca prevents sensitive calcium physiological disorders (apical rot, pitting etc..). It improves the quality and shelf life of fruits and increases the resistance of plants to environmental stresses, providing an important nutritional action.

COMPOSITION

Organic nitrogen (N)	3%
Calcium Oxide (CaO) water soluble	5%
Total organic carbon (C)	18.5%
Vegetal amino acids and peptides	25%
pH	5.0

ADVANTAGES

- Care and prevention of physiological disorders of Calcium deficiencies (eg bitter pit, rot apical etc..).
- Reduction of fruit cracking.
- Fast-acting and effective.
- Greater consistency and longer shelf life of fruits.
- Nourishing and anti-stress action.

CROP	DOSE	METHOD OF USE
VINEYARDS	2 -3 L/Ha	3 - 4 treatments: starting from berry enlargement
CHERRY	2 -3 L/Ha	Against splits: 2 to 3 interventions by post fruit set every 10 - 15 days
APPLE	1.5 -3 L/Ha	Against bitter pit: 4 to 5 interventions fruit every 12 to 15 days
HORTICULTURE	2 -3 L/Ha	2 to 3 treatments during the growing season as a function of the agricultural and nutritional needs
TOMATO	3 - 4 L/Ha	Against apical rot: 3 to 4 interventions during fruit enlargement
STRAWBERRY	2 - 3 L/Ha	1 to 3 treatments during the growing season (repeat every 10 - 12 days)
