

OASI BIO

Fluid organic fertilizer NK 3-6 for fertigation. More fruit quality.

OASI BIO is an innovative liquid organic fertilizer NK for fertigation - **suitable for organic farming** - rich in vegetal extracts, amino acids, organic nitrogen, potassium (not from KCl!), trace-elements (Ca, Mg, Fe, Zn...) and organic matter.

The balanced content of organic nitrogen, potassium and trace elements improves plant development and fruit quality. Vegetal extracts and amino acids stimulate the metabolism and help the plant to overcome environmental stress (drought, heat, ...). Organic matter improves biological and physical soil quality, thus increasing fertility.

USE AND DOSES

OASI BIO is a fertilizer for fertigation (but it can be used also for foliar application). Doses should be given according to the needs and nutritional status of the crops. In average conditions:

CROP	DOSE (FERTIGATION)
Horticulture (under greenhouse)	10 - 40 L/1000 m ²
Horticulture (open field)	10 - 20 L/1000 m ²
Orchards	15 - 40 L/Ha
Vineyard	10 - 40 L/Ha
Floriculture and Ornamentals	10 - 35 L/1000 m ²
Cereals (wheat and corn)	10 - 30 L/Ha
Industrial crop	15 - 30 L/Ha

Foliar application: 200-250 ml/100 L of water, repeating 2-4 times as need.

PACKAGE: 20 L - 1000 L

COMPOSITION

Organic nitrogen (N)	3%
Potassium Oxide (K ₂ O) water soluble	6%
Total Organic Carbon (C)	20%

MISCIBILITY

OASI BIO is miscible with the most common phytosanitary products and fertilizers. Before using OASI BIO we recommend testing on small surface for compatibility with other products. Don't mix with copper-based products, mineral oils and alkaline products.

SUITABLE FOR ORGANIC FARMING
