Trionem Green Plus

PRODUCT

Trionem Green Plus is a revitalizing base fertilizer for tired and impoverished soils, designed specifically to increase their long-term fertility. It is a product based on valuable raw materials of plant and animal origin, activated by the bacterial strains: *Thermoactinomyces* spp., *Streptomyces* spp. and *Bacillus* spp., obtained through the exclusive *Microzym Trio* production technology. It is they who guarantee the high and constant effectiveness of Trionem Green Plus against soil fatigue. Trionem Green Plus is enriched with three types of vegetable panels: *Brassicaceae*, *Meliaceae* e *Liliaceae*; hence the prefix TRIO in the product name. In contact with water, the Foam technology generates a micro-foam that oxygenates the soil making it more hospitable for the plant and its roots.

COMPOSITION

Total Nitrogen (N)	3,0 %	Total Sulphur trioxide (SO ₃)	12,0 %
Organic Nitrogen (N)	3,0 %	Organic Carbon (C)	19,0 %
Total Phosphorus pentoxide (P ₂ O ₅)	3,0 %	Organic substance	38,0 %
Total Calcium oxide (CaO)	13,0 %		

Components: protein hydrolysates with variable mineralization, cattle manure, poultry manure, plant cakes of *Brassicaceae*, *Meliaceae* and *Liliaceae*, calcium sulfate (gypsum), preparations of micro-organisms allowed by Reg. EC 889/2008.

DOSES AND ADMINISTRATION

Crops	Land application	Dose kg/ha
Fruit trees	Before planting on the entire surface	2000-2500
Horticultural crops in greenhouse	Before sowing/transplantation on refined and dry soil	2000-3000
Horticultural crops in full field	Before sowing/transplantation on refined and dry soil	2000-2500

Trionem Green Plus carries out its activity best when applied prior to soil solarization, on refined and dry soils. After distribution, bury the product and water abundantly in order to activate the fertilizer. Cover the land with plastic film and proceed to normal solarization practice. The presence of plastic film extends the action of the volatile molecules released by Trionem Green Plus. Aforementioned doses are indicative and may vary in relation to the pedo-climatic characteristics of each zone.

WARNINGS

The product must be buried, avoiding direct contact with the fertilized plants. Store in cool, dry place and keep away from excessive heat. For the best use of this product, consult the fertilization plans.

FORMULATION

Pellet/powder

PELLET DIAMETER

3,5 mm

HUMIDITY
