Ryzoleaf NPK 15-5-30 + 2 MgO + Micro

DESCRIPTION

Ryzoleaf NPK 15-5-30 +2 MgO + Micro effectively nourishes the plant through the leaves thanks to the high quality of the raw materials with which it is formulated and to the transaminating vehiculating action of *RyZea*, an exclusive production technology that enriches the formulation of compounds with chelating action. Ryzoleaf NPK 15-5-30 +2 MgO + Micro is a low-chlorine product with a high amount of potassium, which accompanies fruit development, improving cell expansion and qualitative characteristics, and high concentrations of microelements chelates. In particular, Ryzoleaf NPK 15-5-30 +2 MgO + Micro brings Magnesium, an element that improves the photosynthetic efficiency of the crop by improving the pigmentation of the tissues.
