Petro NP 315

Gradually nourishes starting from the vegetative emergence / regrowth

1 emergence / regrowtr

Phytostimulates plant metabolism

Significantly increases soil fertility

A NEW WAY OF BASAL FERTILIZING

Petro NP 315

PRODUCT

Petro NP 315 is an organo-mineral fertiliser made from high-quality raw materials that have been carefully selected to result in a planned release of nutrients. They are characterised by different net mineralisation rates. Petro NP 315 is both a nutrient and soil conditioner, a "desalinator" and "unblocker" thanks to the presence of calcium. In addition, the product contains valuable organic matter, which is highly humified and stabilised thanks to the maturation process it undergoes only in Agriges' factories. Thanks to this, Petro NP 315 is characterised by a composition rich in humic and fulvic acids and an optimal C/N ratio. Finally, Petro NP 315 is enhanced by the presence of RyZea, an exclusive technology that enriches the product with phytostimulant molecules that improve root development, nutrient uptake and crop productivity.

COMPOSITION			
Total Nitrogen (N)	3,0 %	Total Calcium oxide (CaO)	21,0 %
Organic Nitrogen (N)	3,0 %	Organic Carbon (C)	12,0 %
Total phosphorus pentoxide (P ₂ O ₅)	15,0 %		

Components: protein hydrolysates with variable mineralization, dried poultry manure, soft ground rock phosphate, calcium sulphate, RyZea.

DOSES AND ADMINISTRA	TION	
Crops	Soil application	Dose kg/ha
Fruit trees	At the planting, before the vegetative reawakening or after the harvest	700-1000
Horticultural	Before sowing/transplanting during the working of the soil	500-900
Industrial, Cereals	Before sowing/transplanting during the working of the soil	600-1000
IV range crops	Before sowing during the working of the soil	400-600

Aforementioned doses are indicative and may vary in relation to the pedo-climatic characteristics of each zone.

WARNINGS

The product must be buried, avoiding direct contact with the fertilized plants. Store in cool, dry place and keep away from excessive heat. For the best use of this product, consult the fertilization plans.

FORMULATION	PELLET DIAMETER	HUMIDITY	PACKAGES
Pellet/powder	3,5 mm	5 - 6 %	25 - 600 kg / Sack, big bag
