PETRO 357 W

BASAL DRESSING LINE

Gradually nourishes starting from the vegetative emergence / regrowth

1)

Phytostimulates plant metabolism

RyZea increases the availability of nutrients

A NEW WAY OF BASAL FERTILIZING

PETRO 357 W

PRODUCT

Petro 357 W is an organic-mineral fertilizer that is yielded from the processing of fine, carefully selected raw materials to determine a timed release of nutrients. These are, in fact, characterized by different net rates of mineralization. Petro 357 W supplies calcium and sulphur, two essential elements that nourish and improve the chemical-physical characteristics of the soil. *RyZea*, Petro 357 W yield a completely exclusive formulation deliberately enriched with special known chelating agents (e.g., glycine) able to "bind" soil nutrients and convey them to plants more easily and effectively. Among the other components, *RyZea* provides a high percentage of amino acids, improving plant recovery after winter stasis.

COMPOSITION			
Total Nitrogen (N)	3,0 %	Total Calcium oxide (CaO)	12,0 %
Organic Nitrogen (N)	2,0 %	Total sulphur trioxide (SO ₃)	9,0 %
Ammoniacal Nitrogen (N)	1,0 %	Magnesium oxide (Mg0)*	1,0 %
Total phosphorus pentoxide (P_2O_5)	5,0 %	Organic Carbon (C) of biological origin	22,0 %
Water-soluble Potassium oxide (K ₂ 0)	7,0 %	Organic substance	44,0 %

^{*} Information not provided on the label because below statutory parameters. **Components**: protein hydrolysates with variable mineralization, humified manure mixture (bovine and poultry), oil cake, potassium chloride, calcium sulphate (gypsum), NP fertilizer, and RyZea.

DOSES AND ADMINISTRATION				
Crops	Soil application	Dose kg/ha		
Fruit trees	At the planting, before the vegetative reawakening or after the harvest	700-1000		
Horticultural crops	Before sowing/transplanting during the working of the soil	500-900		
Industrial crops, Cereals	Before sowing/transplanting during the working of the soil	600-1000		
IV range crops	Before sowing during the working of the soil	400-600		

The above doses are purely indicative and may vary according to the soil and climate characteristics of each area

WARNINGS

The product must be buried, avoiding direct contact with the fertilized plants. Store in cool, dry place and keep away from excessive heat. For the best use of this product, consult the fertilization plans.

FORMULATION	PELLET DIAMETER	HUMIDITY	PACKAGES
Pellet/powder	3,5 mm	5 - 6 %	25 - 600 kg / Bag, big bag
