Buystar Extra NPK

8-24-24

PRODUCT

Buystar Extra NPK 8-24-24 is a microcrystalline fertigator, with total and immediate solubility, characterized by the extreme pureness of the raw materials and by the presence of *RyZea*, the natural, biological activator that enriches the formulation of components enhancing plant metabolism, soil-based processes and the nutritional value of the soil solution. This is possible because the exclusive *RyZea* production technology stimulates the biological activity and the enzymatic processes of the soil, increases the nutritional value of the circulating solution that presents a physiologically acid reaction and, therefore, is able to unlock the nutrients in the soil. Ultimately, Buystar Extra NPK 8-24-24 ensures high production yields and increases resistance to adversity.

COMPOSITION

Total Nitrogen (N)	8,0 %	Phosphorus pentoxide (P ₂ O ₅) water-soluble	24,0 %
Nitric Nitrogen (N)	2,0 %	Potassium oxide (K ₂ O) water-soluble	24,0 %
Ammoniacal Nitrogen (N)	6,0 %	Sulphur Trioxide (SO ₃) water-soluble	18,0 %

Containing *RyZea*, the natural, biological activator of plant origin.

DOSES AND ADMINISTRATION

Crops	Application in Fertigation	Dose kg/ha
Fruit trees	Throughout the development cycle	20-50
Horticultural	Throughout the development cycle	20-50
Industrial	Throughout the development cycle	20-50
Ornamental	Throughout the development cycle	20-40

Aforementioned doses are indicative and may vary in relation to the pedo-climatic characteristics of each zone.

WARNINGS

When mixed with other products, it is always recommended to carry out preliminary tests of miscibility, especially with formulations containing Calcium, and of compatibility on small areas. It is recommended to not apply it with products with strong alkaline reaction. In a mixture with organic substance, for potted plants and in a shielded environment, test and possibly reduce the dosage. Do not exceed the concentration of 2 g/l.

FORMULATION

Soluble microcrystals

PACKAGES

10 - 25 kg / Sack, bag

pH (sol. 6 %)

2,5-4,5

CONDUCTIVITY (sol. 10 %)

40,0-85,0 dS/m
