Buystar Extra NK 5-52

- Source of ready-to-use energy
 - Improves the sugar content and the organoleptic components of the final production
 - Thanks to RyZea, it improves root absorption and chelates the nutritional elements
 - EXTRA-CONCENTRATED FERTIGATOR

Buystar Extra NK 5-52

52,0 %

PRODUCT

Buystar Extra NK 5-52 is a microcrystalline fertigator characterized by total and immediate solubility, by a high amount of Potassium and by the presence of *RyZea*, the natural, biological activator that enriches the formulation of components enhancing the plant metabolism, the land-based activity and the nutritional value of the soil solution. Buystar Extra NK 5-52 provides a high amount of Potassium which directly affect the quality of the final production. In fact, Potassium shifts plant's metabolism from vegetative to reproductive development, containing excessive growth. Furthermore, by regulating the osmotic cell pressure, Potassium accompanies fruit development, improving cell expansion and qualitative characteristics.

Potassium oxide (K₂O) soluble in water

| COMPOSITION | |
|--------------------|--------|
| Total Nitrogen (N) | 5,0 % |
| N:+-::+ (NI) | F 0 0/ |

Containing RyZea, the natural, biological activator of plant origin.

| DOSES AND ADMINISTRATION | | | | |
|--------------------------|----------------------------------|------------|--|--|
| Crops | Application in Fertigation | Dose kg/ha | | |
| Fruit trees | Throughout the development cycle | 20-50 | | |
| Horticultural | Throughout the development cycle | 20-50 | | |
| Industrial | Throughout the development cycle | 20-50 | | |
| Ornamental | Throughout the development cycle | 20-40 | | |

Aforementioned doses are indicative and may vary in relation to the pedo-climatic characteristics of each zone.

WARNINGS

When mixed with other products, it is always recommended to carry out preliminary tests of miscibility, especially with formulations containing Calcium, and of compatibility on small areas. It is recommended to not apply it with products with strong alkaline reaction. In a mixture with organic substance, for potted plants and in a shielded environment, test and possibly reduce the dosage. Do not exceed the concentration of 2 g/l.

| FORMULATION | PACKAGES | pH (sol. 6 %) | CONDUCTIVITY (sol. 10 %) |
|-----------------------|------------------------|----------------------|--------------------------|
| Soluble microcrystals | 10 - 25 kg / Sack, bag | 2,5-4,5 | 40,0-85,0 dS/m |
