Petro 390 Plus

BASAL DRESSING LINE

Gradually nourishes starting from the vegetative emergence / regrowth

1) emergence / regrowth

Phytostimulates plant metabolism

Significantly improves soil fertility

A NEW WAY OF BASAL FERTILIZING

Petro 390 Plus

PRODUCT

Petro 390 Plus is an organo-mineral fertilizer that nourishes plants in a balanced and constant way over time. The precious raw materials of which the product is composed are carefully selected to determine a programmed release of nutrients. In fact, they are characterized by different net mineralization rates and perform a "desalination" and "unblocking" action on nutrients, improving the chemical-physical properties of the soil. Furthermore, Petro 390 Plus is enriched by the presence of RyZea, an exclusive technology which enriches the product with phytostimulant molecules which improve root development, the amount of nutrients absorbed and the productivity of the crop. Petro 390 Plus effectively nourishes the plant, promoting the beneficial microbial activity of the soil.

COMPOSITION			
Total Nitrogen (N)	3,0 %	Total Calcium oxide (CaO)	16,0 %
Organic Nitrogen (N)	3,0 %	Organic Carbon (C)	13,0 %
Total phosphorus pentoxide (P ₂ O ₅)	9,0 %	Organic substance	26,0 %

Components: protein hydrolysates with variable mineralization, humified manure mixture (bovine and poultry) not coming from industrial farms, vegetable cakes, soft ground rock phosphate (with a cadmium content lower than or equal to 90 mg/kg of P2Os), calcium sulphate (plaster) only of natural origin, RyZea.

DOSES AND ADMINISTRATION				
Crops	Land application	Dose kg/ha		
Fruit trees	At the planting, before the vegetative reawakening or after the harvest	700-1000		
Horticultural	Before sowing/transplanting during the working of the soil	500-900		
Industrial, Cereals	Before sowing/transplanting during the working of the soil	600-1000		
IV range crops	Before sowing during the working of the soil	400-600		

Aforementioned doses are indicative and may vary in relation to the pedo-climatic characteristics of each zone.

WARNINGS

The product must be buried, avoiding direct contact with the fertilized plants. Store in cool, dry place and keep away from excessive heat. For the best use of this product, consult the fertilization plans.

FORMULATION	PELLET DIAMETER	HUMIDITY	PACKAGES
Pellet/powder	3,5 mm	5 - 6 %	25 - 600 kg / Bag, big bag

Soil

application

Allowed in Organic Farming
