Petro 330 Boro +

DESCRIPTION

Petro 330 Boro + is an organic fertilizer that nourishes plants in a balanced and constant way over time. Its fine raw materials are carefully selected to determine a planned nutrient release, as they are characterized by different net mineralization rates. In addition, Petro 330 Boro + is enriched by the presence of *RyZea*, an exclusive technology that enriches the product with phytostimulant molecules that improve root development, the amount of nutrients absorbed and the productivity of the crop. Petro 330 Boro + is enriched with Calcium, Sulphur and Boron. While Calcium and Sulphur perform a "desalinating" and "unblocking" action towards the nutrients, improving the chemical-physical properties of the soil, Boron is an essential micro-element for flowering and fruit ripening.

COMPOSITION

Total Nitrogen (N)	3,0 %	Total Sulphur trioxide (SO ₃)	9,0 %
Organic Nitrogen (N)	3,0 %	Total Magnesium oxide (MgO) *	1,0 %
Total Phosphorus pentoxide (P ₂ O ₅)	3,0 %	Total Boron (B)	0,1 %
Total Potassium oxide (K ₂ O) *	1,0 %	Organic Carbon (C) of biological origin	15,0 %
Total Calcium oxide (CaO)	12,0 %	Organic matter	30,0 %

* data not shown on the label because below the limits of the law. **Components:** protein hydrolysates with variable mineralization, humified mixture of manure (from cattle and poultry), from cattle and poultry, calcium sulfate (gypsum) boric acid, RyZea.

DOSES AND INSTRUCTIONS FOR USE

Crops	Soil application	Dose kg/ha
Tree crops	Upon planting, before vegetative resumption or after harvesting	1000-1200
Horticultural crops	Before sowing/transplanting during tillage	700-1000
Industrial crops, Cereals	Before sowing/transplanting during tillage	800-1200
Fourth range vegetable	Before sowing during tillage	500-700

The above doses are purely indicative and may vary according to the soil and climate characteristics of each area

WARNINGS

The product must be buried, avoiding direct contact with the fertilized plants. Store in a cool, dry place, away from excess heat. To use the product in the best way, consult the fertilization plans.

FORMULATION

Pellets/powder

PELLET DIAMETER

3,5 mm

HUMIDITY

5 - 6 %

PACKAGES

25 - 600 kg / Bag, big bag
