**DUTY TO COMUNICATE INFORMATION
TECHNICAL DATA SHEET (REACH art. 32)**

Boron ethanol amine

Under Art. 32 of EC Regulation 1907/2006/

Preparation : March 29, 2011

Version n. 1

**Information Sheet for the downstream users of
non dangerous substances and mixtures under
Article. 32 of EC Regulation 1907/2006 (REACH)**

Product identification

Names: Boron ethanol amine

EC number: 247-421-8

CAS number: 68425-67-2

Trade name: **B-Polkel**

Use: in agriculture as fertilizer

Responsible of placing on the market

L.E.A. S.r.l. Società Unipersonale

Viale delle Nazioni, 77

41122 MODENA (MO)

E-mail: info@leaagricoltura.it

Substance description:

Aspect: liquid

Colour: white

Odour : typical

Information along the supply chain

REACH registration number of the substances:
registration deadline, may 2018

Substances subject to authorization: None

Restrictions on substances: None.

Safe Use

For agriculture only.

Outdoors Dispersive Use.

Store in closed containers and protected from the sun, away from heat sources and flammable materials.

FIRST-AID MEASURES

General: In some cases medical attention necessary (see below).

Inhalation: Remove from source of exposure to dusts.

Obtain medical attention if ill effects occur.

Ingestion: Do not induce vomiting.

Rinse mouth and then give water or milk to drink. Obtain medical attention if more than a small quantity has been swallowed.

Skin contact: Wash the affected area with soap and water.

Eye contact: Flush/irrigate eyes with copious amounts of water for at least 10 minutes.

Obtain medical attention if eye irritation persists.

Note to physician: Inhalation of fire and thermal decomposition gases, containing ammonia, can cause irritation and corrosive effects on the respiratory system. Some lung effects may be delayed.

FIRE-FIGHTING MEASURES

Suitable extinguishing media: If fertilizer is not directly involved in the Fire

Use the best means available to extinguish the Fire.

If fertilizer is involved in the Fire

Use plenty of water, foam or dry chemical

Extinguishing media not to be used: None

Specific hazards: Heating to decomposition gives toxic fumes

Hazardous thermal decomposition and

combustion products: Ammonia and possibly oxides of phosphorus

Special fire fighting procedures: Open doors and windows of the store to give maximum ventilation.

Avoid breathing the fumes (toxic); stand up-wind of the Fire.

Special protective equipment for fire-fighters:

Use a self-contained breathing apparatus if fumes are being entered.

ACCIDENTAL RELEASE MEASURES

Personal precautions: Avoid walking through spilled product and exposure to dust.

Environmental precautions: Depending on the degree and nature of contamination, dispose of

Version n. 1

by use as a fertilizer on farm or to an authorised waste facility. Take care to avoid the contamination of watercourses and drains and inform the appropriate authority in case of accidental contamination of watercourses. Methods for cleaning up: Any spillage of fertilizer should be cleaned up promptly, swept up and placed in a clean labelled open container for safe disposal, avoiding dusty conditions.

Remarks: company input.

Note: see section Exposure controls/ Personal protection for personal protective equipment and section disposal considerations for waste disposal.

HANDLING AND STORAGE

Handling: Avoid excessive generation of dust.

Avoid contamination by combustible (e.g. diesel oil, grease, etc.) and/or other incompatible materials.

Avoid unnecessary exposure to the atmosphere to prevent moisture pick-up.

When handling the product over long periods use appropriate personal protective equipment, e.g. gloves.

Carefully clean all equipment prior to maintenance and repair.

Storage: Store in compliance with national and local regulations

Locate away from the sources of heat or fire.

Keep away from combustible materials and substances mentioned under Section 10.

On farm, ensure that the fertilizer is not stored near hay, straw, grain, diesel oil, etc.

When stored loose, take particular care to avoid mixing with other fertilizers.

Ensure high standard of housekeeping in the storage area.

Do not permit smoking and the use of naked lights in the storage areas.

It is recommended to restrict the stack size and to keep at least 1 m distance around the stacks of bagged products.

Any building used for the storage should be dry and well ventilated.

Specific use(s): Company input

Packaging materials: Plastic synthetic materials, steel and aluminum are suitable. Avoid use of copper.

EXPOSURE CONTROLS

Exposure limit values: No specific official EU limit. ACGIH recommended value for nuisance dust for inhalable particulates: TLV/TWA : 10mg/m³. Company input or where National Limits are specified.

Engineering measures: Avoid high dust concentration and provide ventilation where necessary.

Hygienic measures: When handling the product do not eat, drink or smoke. Wash hands after handling and before eating, smoking and using the lavatory and at the end of the working period.

Personal protection

Respiratory system: If ventilation is inadequate, use suitable dust mask or respirator if dust concentration with an appropriate filter (EN 143, 149, filters P2, P3).

Skin and body: Working clothes.

Hands: Wear suitable gloves (e.g. plastic, rubber or leather) when handling the product over long periods

Eyes: Safety glasses with side shields (EN 166).

Environmental exposure controls: See Section accidental release measures

Advice on personal protection is applicable for high exposure levels.

**DUTY TO COMMUNICATE INFORMATION
TECHNICAL DATA SHEET (REACH art. 32)**

Boron ethanol amine

Under Art. 32 of EC Regulation 1907/2006/

Preparation : March 29, 2011

Version n. 1

Select proper personal protection based on a risk.

STABILITY AND REACTIVITY

Stability: The product is stable under normal conditions of storage, handling and use.

Conditions to avoid: Heating above 155 degree celcius (decomposes).

Contamination by incompatible materials.

Closeness to sources of heat or fire.

Heating under confinement.

Welding or hot work on equipment or plant which may have contained fertilizer without first washing thoroughly to remove all fertilizer.

Materials to avoid: Alkalies, strong acids, copper and its alloys

Hazardous decomposition products:

For fire situation: see Section fire-fighting measures

Ammonia is released upon reaction with strong bases or when heated.

DISPOSAL CONSIDERATION

Methods of disposal: Depending on degree and nature of contamination dispose of by use as fertilizer on farm, as raw material for liquid fertilizer, or to an authorised waste facility.

Do not empty into drains; dispose of this material and its container in a safe way and in accordance with all applicable local and national regulations.

Chapters 06 03 99 of the list of wastes

(Commission decision 2000/532/EC)

Package waste disposal: Empty the bag by shaking to remove as much as possible of its contents.

If approved by ocal authorities, empty bags may be disposed of as non-hazardous material or returned for recycling.

Note: see section handling and storage for safe handling and storage
